

TW-Risers by Infiltrator are made from glass-reinforced polypropylene, providing superior strength and durability. They come in green or black with a 24" diameter, making them ideal for use with any concrete or plastic tank. The slip-resistant lids are fastened using stainless steel screws and are further secured by indexing structural ribs, which lock the riser into place.

TW-Riser system lids are made from virgin polyethylene, providing strength and increased impact resistance. Slip-resistant lids come with an indexing mechanism locking them into place and can withstand a wheel load comparable to that of a full size pick-up truck. The improved urethane gasket creates a built-in watertight seal.

TW-Risers include a set of indexing structural ribs which lock riser pieces in place to ensure a watertight seal.
